First Quarter 2025 Cross-Asset Review

A turbulent first quarter was marked by uncertainty over President Trump's tariff policies, the corresponding economic impact, and the unexpected release of competitive, lower-cost Chinese AI models. The MSCI World Index fell 1.8% in USD, led by the "Magnificent 7," which suffered one of their worst quarters on record. International equities (MSCI EAFE +6.9% USD) outperformed, bolstered by improving economic conditions and a historic shift in German fiscal policy to release its debt brake, paving the way for €500B in new spending. Foreign currencies strengthened against the US dollar (DXY Index -3.9%) as concerns over President Trump's protectionist actions contributed to a narrowing of growth and interest rate differentials. Bonds (Barclay's Global Agg +2.6%) were resilient, with escalating recession fears driving a flight to safety and sending treasury yields lower. Commodities (S&P GSCI +3.4%) benefitted from the unstable policy and geopolitical landscape, which pushed gold and US copper futures to record highs.

Equities: US stocks (MSCI USA -4.6%) declined as uncertainty over President Trump's trade policies has caused investors to question the post-election optimism surrounding US economic exceptionalism. The weakness in US equities was exacerbated by a 15% drawdown in the "Magnificent 7," as new AI products from China, notably DeepSeek, challenged the high expectations embedded in these stocks. European equities (MSCI Europe +10.5% USD, +6.2% local FX) outperformed US stocks by the largest margin in nearly 40 years. European stocks were supported by improving economic data, positive corporate earnings revisions, and clear signals from policymakers about taking meaningful steps to stimulate growth. Conversely, Japanese (MSCI Japan) equities fell 4.5% in yen terms (+0.3% USD) due to fears that Trump's tariffs would impair their export-driven economy.

Emerging markets (MSCI EM +2.9% USD) benefitted from robust gains in China (MSCI China +15.0% USD) and Brazil (MSCI Brazil +14.0% USD), offsetting declines in India (MSCI India -3.0% USD). Chinese stocks rallied on the back of additional government stimulus measures and a tech sector that has been reinvigorated following local AI developments. Brazilian equities recovered due to optimism about improved fiscal stability, while Indian stocks were pressured by lackluster corporate earnings and moderating government spending.

Continued on the following page.

First Quarter 2025 Cross-Asset Review (cont'd)

Currencies: Narrowing growth and interest rate differentials between the US and non-US economies supported broad-based foreign currency appreciation against the US dollar. The impact was particularly profound in Europe (euro +4.3% v. USD), where improving economic conditions were bolstered by pledges for substantial fiscal support. In Japan, the yen (+5.1% v. USD) benefitted from rising inflation, higher rates, and diverging monetary policies vis-à-vis the US. The Turkish lira and Indonesian rupiah were among the few currencies to depreciate against the greenback, falling 6.8% and 2.8%, respectively. The lira slumped after Turkish President Erdogan detained his main political rival, while the rupiah approached its lowest level since the Asian financial crisis over fears of a return to military domination. Cryptocurrencies (Bitcoin -11.7%, Ethereum -45.4%) plummeted, driven by their procyclical speculative nature.

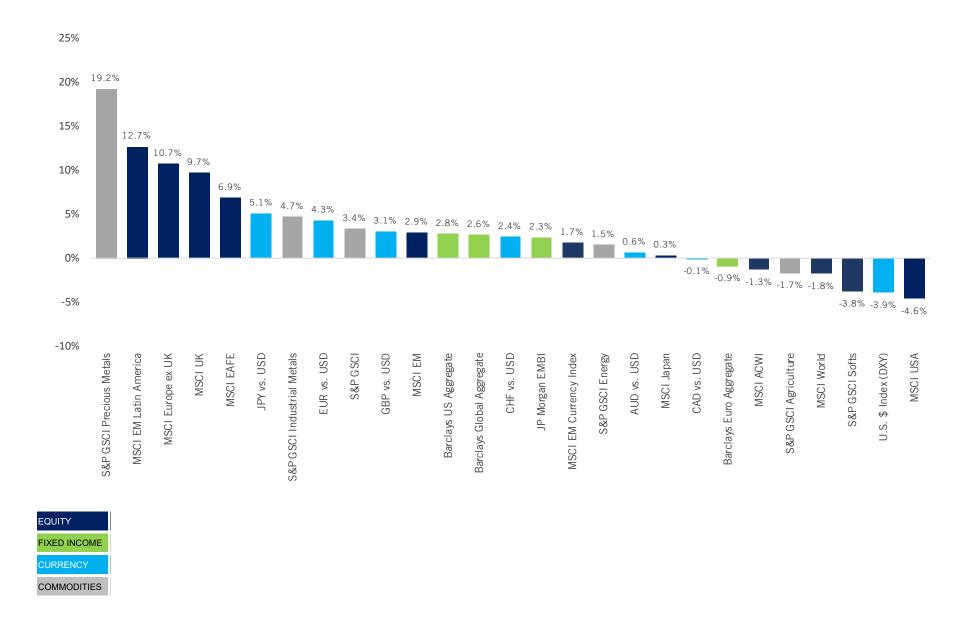

Bonds: US bonds (Barclays US Agg +2.8%) rallied, with yields falling along the curve as uncertainty over tariffs increased fears of a recession. The flight to safety contributed to demand for US treasuries, pushing US 10-year (-36 bps to 4.2%) yields lower. In contrast, longer-duration yields climbed considerably in both Europe and Japan. In Europe, Germany's shocking policy change to release their debt brake and approve €500B in new government spending propelled 10-year sovereign yields higher (+34 bps to 2.7%). 10-year Japanese government bonds (+43 bps to 1.5%) surged to their highest level since the GFC, as escalating inflationary pressures drove expectations of further policy tightening from the BoJ.

Commodities: Precious metals (GSCI Precious Metals +19.2%) led the major commodity indices. Gold surged 18.8%, reaching a record \$3,122/ozt, as investors sought safe-haven assets amid concerns over tariffs, rising fiscal deficits, and geopolitical instability. Industrial metals (GSCI Ind. Metals +4.7%) were bolstered by a 26% rise in copper futures prices, breaching record levels, as US companies stockpiled in advance of expected tariffs. US natural gas (+33% to \$4.1/mbtmu) surged as high demand from cold weather and LNG exports depleted inventories. Agricultural (GSCI Agg -1.7%) commodities experienced mixed results, driven by idiosyncratic factors. Orange juice prices plummeted 51% on demand concerns, while egg prices sank 35% as supply recovered from a bird flu outbreak that has killed over 165 million chickens since 2022. Coffee prices rose 18.6% to \$382/lb, hitting all-time highs, due to a fourth consecutive season of adverse weather impacting supply.

Important Considerations and Assumptions

This market overview provides comprehensive data on global markets without reference to Altrinsic products. This overview is being provided for informational purposes only and is designed as an educational tool to assist Altrinsic and its clients in reviewing developments across asset classes throughout the quarter.

All information is to be treated as confidential and may not be reproduced or redistributed in whole or in part in any manner without the prior written consent of Altrinsic Global Advisors, LLC ("Altrinsic"). The information contained herein shall not be relied upon as a primary basis for any investment decision, including, without limitation, the purchase of any Altrinsic products or engagement of Altrinsic investment management services; there is no and will be no agreement, arrangement, or understanding to the contrary.

This material has been prepared by Altrinsic on the basis of publicly available information, internally developed data and other third party sources believed to be reliable. However, no assurances or representations are provided regarding the reliability, accuracy or completeness of such information and Altrinsic has not sought to independently verify information taken from public and third party sources. Altrinsic does not accept liability for any loss arising from the use hereof. Any projections, market outlooks or estimates in this document are forward-looking statements and are based upon certain assumptions. Due to various risks and uncertainties, actual events or results, or the actual performance of any investment or strategy may differ materially from those reflected or contemplated in such forward-looking statements. Except where otherwise indicated, the information provided, including any investment views and market opinions/analyses expressed, constitute judgments as of the date of this document and for as of any future date. This information will not be updated or otherwise revised to reflect information that subsequently becomes available, or changes in circumstances or events occurring after the date hereof.

This document is a general communication being provided for informational purposes only. It is educational in nature and is not designed to be advice or a recommendation for any specific investment product or strategy in any jurisdiction, nor is it a commitment from Altrinsic to participate in any transactions mentioned herein. This material does not constitute investment advice and should not be viewed as current or past recommendations or a solicitation of an offer to buy or sell any securities or to adopt any investment strategy. Any documents describing Altrinsic's products or services shall not constitute an offer to sell or a solicitation to buy the securities from any person in any jurisdiction where it is unlawful to do so. Any specific investments referenced may or may not be held by accounts managed by Altrinsic and do not represent all of the investments purchased, sold or recommended for client accounts. Readers should not assume that any investments in securities described were or will be profitable. There are no guarantees that investment objectives will be met. Investing entails risks, including possible loss of principal. Altrinsic may objective of long-term capital appreciation and reduced risk.

Past performance is not a guide to or otherwise indicative of future results. No representation is being made that any account will or is likely to achieve future profits or losses similar to those shown. Any investment results and portfolio compositions are provided for illustrative purposes only and may not be indicative of the future investment results or portfolio composition of any account, investment or strategy managed by Altrinsic.

Additional Performance Disclosure – Use of Benchmarks: Benchmarks are provided for illustrative purposes only. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that may differ from the accounts, investments or strategies managed by Altrinsic. Because of these differences, benchmarks should not be relied upon as an accurate measure of comparison.

The MSCI information may only be used for your internal use, may not be reproduced or redisseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. None of the MSCI information is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Historical data and analysis should not be taken as an indication or guarantee of any future performance analysis, forecast or prediction. The MSCI information is provided on an "as is" basis and the user of this information assumes the entire risk of any use made of this information. MSCI, each of its affiliates and each other person involved in or related to compiling, computing or creating any MSCI information (collectively, the "MSCI Parties") expressly disclaims all warranties (including, without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose) with respect to this information. Without limiting any of the foregoing, in no event shall any MSCI Party have any liability for any direct, indirect, special, incidental, punitive, consequential (including, without limitation, lost profits) or any other damages. Index Definitions

| MSCI World Index | The MSCI World Index is a broad global equity index that represents large and mid-cap equity performance across 23 developed markets countries. |
|---|--|
| MSCI All Country World (ACWI) | MSCI ACWI Index captures large and mid cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. |
| MSCI EAFE | The MSCI EAFE Index is designed to represent the performance of large and mid-cap securities across 21 developed markets, including countries in Europe, Australasia and the Far East, excluding the U.S. and Canada. |
| MSCI USA | The MSCI USA Index is designed to measure the performance of the large and mid cap segments of the US market. |
| MSCI EM (Emerging Markets) | The MSCI Emerging Markets Index captures large and mid cap representation across 24 Emerging Markets (EM) countries. |
| MSCI World Countries | The MSCI World Country Indices are designed to measure the performance of the large and mid cap segments of the underlying country. |
| MSCI AC World Growth | The MSCI ACWI Growth Index captures large and mid cap securities exhibiting overall growth style characteristics across 23 Developed Markets (DM) countries and 24 Emerging Markets (EM) countries. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short- term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend. |
| MSCI AC World Value | The MSCI ACWI Value Index captures large and mid cap securities exhibiting overall value style characteristics across 23 Developed Markets countries and 24 Emerging Markets (EM) countries. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. |
| MSCI USA Growth | The MSCI USA Growth Index captures large and mid cap securities exhibiting overall growth style characteristics in the US. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend. |
| MSCI USA Value | The MSCI USA Value Index captures large and mid cap US securities exhibiting overall value style characteristics. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. |
| MSCI Cyclical & Defensive Sectors | All constituent securities from Consumer Discretionary, Financials, Real Estate, Industrials, Information Technology, Materials and Communication Services are included in the MSCI Cyclical Sectors Indexes. All constituent securities from Consumer Staples, Energy, Healthcare, and Utilities are included in the MSCI Defensive Sectors Indexes. For each Index, the constituents are weighted based on their free float market capitalization. |
| CBOE Market Volatility Index | The CBOE Volatility Index (VIX) is a measure of the stock market's expectation of volatility implied by S&P 500 index options. |
| S&P GSCI Indices | The S&P GSCI is designed to be a "tradable" index, providing investors with a reliable and publicly available benchmark for investment performance in the commodity markets. The index comprises the principal physical commodities that are traded in active, liquid futures markets. |
| United States Dollar Index | The U.S. Dollar Index is a geometrically-averaged calculation of six currencies weighted against the U.S. dollar. The U.S. Dollar Index contains six component currencies: the euro, Japanese yen, British pound, Canadian dollar, Swedish krona and Swiss franc. |
| MSCI EM Currency (USD) | The MSCI Emerging Markets (EM) Currency Index will track the performance of twenty-five emerging-market currencies relative to the US Dollar. |
| FTSE WGBI (LOC) | The FTSE World Government Bond Index (WGBI) measures the performance of fixed-rate, local currency, investment-grade sovereign bonds. |
| JP Morgan EMBI Global | The J.P.Morgan Emerging Markets Bond Index Global tracks total returns for traded external debt instruments in the emerging markets. |
| JP Morgan EMBI+ | The J.P. Morgan Emerging Markets Bond Index Plus (EMBI+) tracks total returns for traded external debt instruments in the emerging markets. The EMBI+ expands upon J.P.Morgan's original Emerging Markets Bond Index (EMBI). |
| Bloomberg Barclays Global Aggregate | The Bloomberg Barclays Global Aggregate Bond Index is a flagship measure of global investment grade debt from twenty-four local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. |
| Bloomberg Barclays US Aggregate | The Bloomberg Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency). |
| Bloomberg Barclays Euro Aggregate | The Bloomberg Barclays Euro Aggregate Bond Index is a benchmark that measures the investment grade, euro-denominated, fixed- rate bond market, including treasuries, government-related, corporate and securitized issues. Inclusion is based on currency denomination of a bond and not country of risk of the issuer. |
| Bloomberg Barclays High Yield Very Liquid | The Bloomberg Barclays High Yield Very Liquid Index measures the performance of High Yield securities and is selected by a Market Value process. |
| Unit Definitions: Commodities Pages | cbm: Cubic Meters, bbl: barrel, gal: gallon, mmbtu: million British units, mt: metric ton, ozt: troy ounce, lb/lbs: pound, st: short ton (2k lbs.), c/lb: cents/pound, cwt: hundredweight (100lb), bu: bushel (60lb), c/dozen: cents per dozen. |
