

April 2025

Altrinsic Global Equity Commentary - First Quarter 2025

Dear Investor,

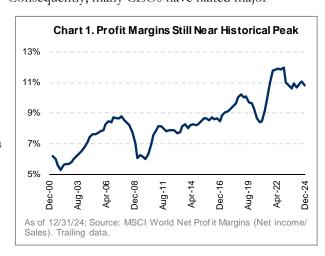

In an eventful first quarter, the Altrinsic Global Equity portfolio gained 6.9% gross of fees (+6.6% net), outperforming the MSCI World Index's 1.8% decline, as measured in US dollars. International equities (EAFE +6.9%) significantly outperformed US equities (S&P 500 -4.3%), and markets broadened out from the narrow technology stock leadership. Uncertainties stemming from President Trump's tariff policies, the release of DeepSeek's AI model, and mixed economic data were catalysts for this transition in market leadership. Against this backdrop, sources of our outperformance were broad-based, most notably from our differentiated positioning and investments in the technology, financials, and consumer discretionary industries.

2025 began with a strong consensus that the prolonged period of US economic and market "exceptionalism" would persist, early AI beneficiaries would continue their unencumbered momentum, and the price paid for access to these themes did not matter. In short order, however, this environment of supreme confidence and perceived certainty gave way to significant uncertainty, prompting a substantial reappraisal of risk and asset values.

The most prominent and immediate source of uncertainty stems from Trump's tariff policies, how other countries respond, and the extent of escalation. Borrowing from Donald Rumsfeld's terminology, the "known unknowns" and "unknown unknowns" far exceed the "known knowns." Consequently, many CEOs have halted major

investment plans, mergers and acquisitions, and other strategic initiatives, as too much policy is in flux.

Increased tariffs typically result in slowing activity, a one-off increase in prices, and adjustments in currencies. We understand our companies' exposures by cost, revenue, and earnings sensitivity to various outcomes; however, the actual outcomes are unknown. A reasonable base case scenario is a further slowdown in sales prospects, margin compression, and lower earnings. Declining profit margins are most underappreciated following a long period of declining labor costs, efficient global supply chains, supportive tax regimes, and confident consumers willing to pay rising prices. Profit margin risk is present in many stocks across industries, but

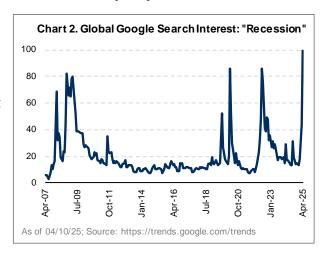

most notably in cyclical sectors where current operating margins are at or near historic peaks.

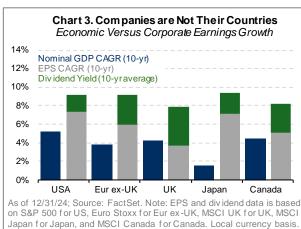

We were already concerned about valuations, margins, and earnings expectations in many areas, particularly in technology and traditional cyclicals (industrials and materials), prior to the tariff issues. With relatively low exposure to these areas in favor of companies with modest but durable growth prospects and those with more idiosyncratic risks, our portfolio has a lower overall beta profile. Given severe share price movements, we are being opportunistic among companies where tariffs might be causing cyclical weakness but are not likely to have their business models meaningfully upended. We remain disciplined in evaluating fundamentals versus price paid.

Media attention has focused on whether tariff policies and the responses will trigger a global recession. We were likely entering a recession, if not already in one, before these events occurred. It is important to recognize that GDP data is a lagging indicator; recessions are typically proclaimed long after the economic pain is felt. Similarly, asset prices typically recover long before economic activity does. While expectations, as reflected in growth estimates and valuations, have risen too high in areas that have led markets during the last decade (namely, the US market and, more specifically, many technology companies), expectations in other areas (notably the EU, Japan, and emerging markets) have fallen.

The US has benefited from enormous fiscal and monetary stimulus since the GFC, a major drawdown on savings, and the wealth effect from rising asset prices. Now, fiscal impulse is reversing, and excess savings have been depleted. Hard data such as GDP and reported earnings have been holding up, but leading sentiment indicators, including CEO confidence, consumer confidence, and messages we hear in our interactions with company executives, are more indicative of economic weakness.

An unintended benefit of Trump's policies and the prevailing geopolitical environment is a major strategic pivot in Europe. Some are drawing parallels to Germany's reunification. Europe's economy has long suffered structural challenges of fragmentation, excessive regulation, bureaucracy, high energy costs, and overly constrictive policy handcuffs. Trump's actions may have spurred the EU to address key issues needed to become a true union with autonomy and less reliance on the US. Announcements relating to fiscal stimulus, including massive increases in defense spending, removing internal barriers, and capital market unification are constructive.

At the company-specific level, many European companies have been delivering solid EPS growth and shareholder value creation, but there is much more that can be unlocked. Undervalued equities with low expectations, improving fundamentals, and an increasingly supportive policy environment contribute to the appeal of European stocks. Accordingly, our greatest regional overweight is to investments headquartered in Europe.

Japan, like most of Asia, is extremely sensitive to trade policy, but we believe the common interests of the US and Japan will prompt a reasonable and manageable outcome. Japanese companies have heightened their focus on creating shareholder value in recent years. While this is unfolding at an incremental pace, the evidence is clear in the data – ROE has improved, M&A activity and activism have increased, and buyback and dividend policies have become more shareholder-friendly. More recently, local wage negotiations and bond yields suggest that Japan may have broken out of its deflationary spiral. Our exposure in Japan, however, remains measured as many companies are still highly exposed to macro gyrations, a strengthening yen, and investor expectations that change will happen quicker than corporate Japan can handle.

Within emerging markets, the impact of the tariffs could be less severe than many fear. Over the last 25 years, there has been a noticeable shift in EM trading patterns and their dependencies on developed markets. Notably, EM has increasingly de-coupled from DM supported by lower intra-EM trade barriers, the relocation of global supply chains, internal consumption trends, and geopolitics. Trade between EM ex. China companies and China has increased 2.6x faster than with the US over the same 25 years.¹ At a company-specific level, many EM firms have been venturing into other emerging and frontier markets in pursuit of profitable growth avenues. So much so that over 70% of their top-line growth is derived from emerging markets regions.²

China remains a source of tremendous risk and opportunity. Trade policy could have a major impact, but it is completely unknowable as we write this. Importantly, China's negotiating position is not as weak as President Trump may believe; they can take a very long-term view, they hold more than \$1T of US treasuries, they control 90% of rare earth metal processing,³ and exports to the US represent roughly 3% of their GDP.⁴ China's recent political and economic congress in Beijing came with confirmation of consumer support underpinning improving expectations for corporate China earnings. Although no large bazooka-type stimulus was presented, additional measures supporting consumption, housing market stability, and a focus on self-sufficiency have already been beneficial. China-related risk remains high but so is the opportunity among a growing number of companies with direct and indirect exposure to China.

Recent developments both during and after quarter-end remind us once again that unexpected things happen all the time. Change is underway, corporates will adapt, and there are many attractively priced companies in areas that have not been top of mind in recent years. As value investors, we are drawn to the fear and uncertainty increasingly embedded in stock prices. Those companies with durable competitive advantages, balance sheet strength, adaptable management teams, and valuations that already discount recessionary conditions are particularly of interest.

We are pleased to share that our partner Rich McCormick's role is being expanded, and he will serve as Co-Chief Investment Officer. We put tremendous effort into developing talent and recognize individuals who embody our cultural values, take initiative, and demonstrate exceptional performance. Rich has excelled in each of these areas and has proven to be a strong leader. The progression of Rich's role since joining the firm in 2009 reflects our unceasing pursuit of growth and improvement, as a team and as individuals.

Thank you for your interest in Altrinsic. Please contact us if you would like to discuss these or other matters in

detail.
Sincerely,
John Hock John DeVita
Enclosure: 1Q25 Performance Review and Investment Activity

¹Performance is presented gross and net of management fees for the composite and includes the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net of fee performance was calculated using the highest applicable annual management fee of 0.85% applied monthly. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. Past performance is not indicative of future results. The outlook and opportunities noted throughout this letter are the opinions of Altrinsic as of the date of this letter. There is no guarantee that we will be successful in implementing investment strategies that take advantage of such perceived opportunities or that any investment in the securities discussed will be profitable. Please see Important Considerations and Assumptions at the end of this letter for additional disclosures. Data sourced from FactSet, MSCI, and Altrinsic research.

1Q25 Performance Review and Investment Activityi

The Altrinsic Global Equity portfolio gained 6.9% gross of fees (+6.6% net) in the first quarter, outperforming the MSCI World Index's decline of 1.8%, as measured in US dollars. Positive attribution was broad-based but led by positioning and investments in the information technology (Genpact, Okta), financials (Hanover Insurance, Intercontinental Exchange, Chubb), and consumer discretionary (Alibaba) sectors. Performance was marginally offset by our underweight exposure to the utilities sector.

Outperformance in the information technology sector was supported by solid performance from our holdings and more broadly by our underweight to highly valued AI-related chip companies. Genpact's strategic shift under its new CEO BK Khalra is yielding benefits through accelerating revenue growth and market share gains. Security software provider Okta showed strong adoption of new products, especially among existing clients, highlighting significant cross-selling opportunity.

In the financials sector, Hanover Insurance continues to turn around its personal insurance unit while producing consistent performance in its business insurance division. Intercontinental Exchange benefited from rising activity as the company continues to monetize its long list of valuable products throughout the fixed income and mortgage food chains. Chubb continues to show why it is a best-in-class insurer, boosting profits by double digits and finding new areas for growth in an otherwise volatile quarter for the industry.

Among our consumer discretionary holdings, Alibaba benefited from improved operating performance in its core e-commerce business, better-than-expected progress on AI model development, improving macro economy, and a better domestic political environment.

Marginal negative attribution came from our relative underweight exposure to the utilities sector, where investors sought steady yields amidst macro uncertainty. Utilities enjoyed more favorable sentiment for the sector's steady yields amidst macro uncertainty. The majority of utility companies, however, still face stagnant end market demand growth and rising financing costs to fund riskier growth projects, while valuations are at historically high levels.

We initiated new positions in four companies (BMW, Intertek, Murata Manufacturing, SMC) and exited four positions (Daimler Truck, Gen Digital, Liberty Global, Lojas Renner).

Bayerische Motoren Werke's (BMW) track record of leveraging its technological capabilities to gain market share and drive pricing puts it in an advantageous position as the industry transitions beyond internal combustion vehicles. Intertek is a leading testing, inspection, and certification provider benefiting from rising regulation and safety standards. Near-term cyclical headwinds for some of its end markets provided a compelling entry point. Similarly, Murata and SMC face end-market growth volatility, but each manufactures complex electrical components showing structural growth and industrial automation and efficiency programs accelerate.

Daimler Truck met our expectations in improving its cost base such that profitability is now closer to peer levels just as the industry faces mounting cyclical headwinds. Gen Digital improved operating performance on the strength of its international business. The discount to our estimate of intrinsic value for both companies narrowed and we exited in favor of more compelling opportunities. Following the spin of their Swiss asset Sunrise, Liberty Global shares were trading at fair value with limited growth potential in the rest of their portfolio. We exited our holding in retailer Lojas Renner as we anticipate continued disappointing Brazilian discretionary consumption hampering the company's growth efforts.

N.A. - Information is not statistically meaningful due to an insufficient period of time.

N.A.1 - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

*Results shown for the year 2000 represent partial period performance from July 1, 2000 through December 31, 2000. The composite inception date is 1July 2000.

Altrinsic Global Equity Composite is a diversified (60 - 100 holdings), bottom-up, fundamental, value oriented, Global, all cap portfolio, benchmarked to the MSCI World (Net) Index (accounts have the ability to invest in 144A stocks). The MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. Portfolios in the composite may invest in countries that are not in the MSCI World (Net) Index. Additional information is available upon request. The minimum account size for this composite is \$5 million. Prior to January 1, 2004, the minimum account size for this composite was \$10 million. Returns include the effect of foreign currency exchange rates. Prior to April 1, 2006 the exchange rate source of the composite was Bloomberg 4pm New York close and the exchange rate source of the benchmark was WM Reuters 4pm London close.

Altrinsic Global Advisors, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. Altrinsic Global Advisors, LLC has been independently verified for the periods from December 8, 2000 through December 31, 2023.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Altrinsic Global Equity Composite has had a performance examination for the periods beginning December 8, 2000 through December 31, 2023. The verification and performance examination reports are available upon request.

Altrinsic Global Advisors, LLC is a registered investment adviser. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Beginning July 1, 2005, composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of at least 40% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite after the first full month under management if fully invested. Additional information regarding the treatment of significant cash flows is available upon request. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. The MSCI World (Net) Index deducts withholding tax by applying the maximum rate of the company's country of incorporation applicable to non-resident institutional investors. The normal characteristics of the transactions in the Altrinsic Global Equity Composite include the purchase and sale of forward currency contracts using a foreign exchange credit line(s) secured by the underlying assets. Past performance is not indicative of future results.

The US dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net of fee performance was calculated using the highest applicable annual management fee of 0.85% applied monthly. Prior to January 1, 2005 the highest management fee applied was 0.75%. The annual composite dispersion is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee schedule is 0.85% on the first \$25 million, 0.60% on the next \$50 million, and 0.50% on the remainder. Some accounts may pay incentive fees. Actual investment advisory fees incurred by clients may vary.

The Altrinsic Global Equity Composite was created January 1, 2004. Performance presented prior to December 8, 2000 occurred while the Portfolio Manager was affiliated with a prior firm and the Portfolio Manager was the only individual responsible for selecting the securities to buy and sell.

Important Considerations and Assumptions

This presentation has been prepared solely for informational purposes and nothing in this material may be relied on in any manner as investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you.

All information is to be treated as confidential and may not be reproduced or redistributed in whole or in part in any manner without the prior written consent of Altrinsic Global Advisors, LLC ("Altrinsic"). The information contained herein shall not be relied upon as a primary basis for any investment decision, including, without limitation, the purchase of any Altrinsic products or engagement of Altrinsic investment management services; there is no and will be no agreement, arrangement, or understanding to the contrary.

This material has been prepared by Altrinsic on the basis of publicly available information, internally developed data and other third party sources believed to be reliable. However, no assurances or representations are provided regarding the reliability, accuracy or completeness of such information and Altrinsic has not sought to independently verify information taken from public and third party sources. Altrinsic does not accept liability for any loss arising from the use hereof. Any projections, market outlooks or estimates in this document are forward-looking statements and are based upon certain assumptions. Due to various risks and uncertainties, actual events or results, or the actual performance of any investment or strategy may differ materially from those reflected or contemplated in such forward-looking statements. Except where otherwise indicated, the information provided, including any investment views and market opinions/analyses expressed, constitute judgments as of the date of this document and not as of any future date. This information will not be updated or otherwise revised to reflect information that subsequently becomes available, or changes in circumstances or events occurring after the date hereof.

The data and information presented is based on representative accounts and is for informational and illustrative purposes only. Individual client data and information may vary based on different objectives for different clients. This material does not constitute investment advice and should not be viewed as current or past recommendations or a solicitation of an offer to buy or sell any securities or to adopt any investment strategy. Any documents describing Altrinsic's products or services shall not constitute an offer to sell or a solicitation to buy the securities from any person in any jurisdiction where it is unlawful to do so. Any specific investments referenced may or may not be held by accounts managed by Altrinsic and do not represent all of the investments purchased, sold or recommended for client accounts. Readers should not assume that any investments in securities described were or will be profitable. There are no guarantees that investment objectives will be met. Investing entails risks, including possible loss of principal. Altrinsic may modify its investment approach and portfolio parameters, in the future, in a manner which it believes is consistent with its overall investment objective of long-term capital appreciation and reduced risk.

Past performance is not a guide to or otherwise indicative of future results. No representation is being made that any account will or is likely to achieve future profits or losses similar to those shown. Any investment results and portfolio compositions are provided for illustrative purposes only and may not be indicative of the future investment results or portfolio composition of any account, investment or strategy managed by Altrinsic.

Disclosure of Risk Factors: An investment in any account, investment or strategy is speculative and involves a significant degree of risk, which each prospective investor must carefully consider. Returns generated from an investment in any account, investment or strategy may not adequately compensate investors for the business and financial risks assumed. An investor in any account, investment or strategy could lose all or a substantial amount of his or her investment. Before making an investment, prospective investors are advised to thoroughly and carefully review any disclosure documents with their financial, legal and tax advisors to determine whether and investment is suitable for them.

Additional Performance Disclosure – Use of Benchmarks: Benchmarks are provided for illustrative purposes only. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that may differ from the accounts, investments or strategies managed by Altrinsic. Because of these differences, benchmarks should not be relied upon as an accurate measure of comparison.

Important Disclosures with Respect to Australia: These materials are not, and under no circumstances are to be construed as, a prospectus, an offering memorandum, an advertisement or a public offering of any securities described herein in Australia or any province or territory thereof. Under no circumstances are these materials to be construed as an offer to sell securities or as a solicitation of an offer to buy securities in any jurisdiction of Australia. Altrinsic Global Advisors, LLC is regulated by the US Securities and Exchange Commission (SEC) under US laws which differ from Australian laws, however, Altrinsic Global Advisors, LLC is exempt from the requirement to hold an Australian Financial Services License (AFSL) under the Corporations Act in respect of financial services it provides to wholesale clients only in Australia.
